

Nova Ultra

Engineered for Flawless Tagless Printing

Nova Ultra is an advanced aluminum pad printing plate, specifically developed to conquer the rigorous demands of the tagless label printing industry.

Advanced German Anodization:

Utilizing ultra-precise instruments, coating thickness is controlled to a strict tolerance of under 3 microns.

Stainless-Steel Durability:

Enhanced surface hardness guarantees zero-defect prints and extreme wear resistance.

Universal Compatibility:

Integrates seamlessly with various ink cups and ink formulations used across different factories.

Extra Cost Savings:

Outlasting competing brands by over 50%, it delivers a guaranteed minimum lifespan of 40,000 times of impressions, with the capability to reach up to 60,000 prints.
